How to Install myK9Q app

The app works on any cellphone, tablet or even desktop, though there are different ways to install it depending on the operating system.

1. Try this first.
    a. Go to this website: myk9q.flutterflow.app
    b. It should take you to a big blue screen like the one on the side of this page.
2. If #1 doesn't work, go to https://www.myk9t.com/
    a. Click the Software dropdown, then click the myK9Q App link
    b. If you have an Android phone or tablet, click Android Install.
    c. All others clip Web App
    d. It should bring you to the big blue myK9Q screen
3. If #s 1 & 2 don't work and if you have an Apple product, you will have to go to the Apple Store and download the Chrome App. It's free. Then start all over at number 2 and click the Web App
4. If none of these work, email me with the following information:
    a. What kind of devise are you using (make of cellphone, make of tablet, what version)
    b. Give details of what's happening, screen shots would be ideal.
